

# Special Effects Designer...

By Skylar Daugherty

# Definition...

A Special Effects Designer is a job that makes everything you see in movies and tv programs. Goes from stunts to illusions to costumes.

# More details about what special effect designers do..

They have a very wide set thinking process. They have to plan the all the action you see in movies, plan the props, plan the costumes and plan what a character looks like.

Where do they  
work?

They usually work in  
film studios.

---

# Salary...

They make  
about seventy  
thousand  
dollars a year

# They need this education...

An art degree with film production and technology courses.

A product they produce is makeup, and props for actors and actresses

# What is the most interesting thing?

I think the most interesting thing is all the different styles they use in makeup. Also all the different things they do in their job, like design stunts and props.

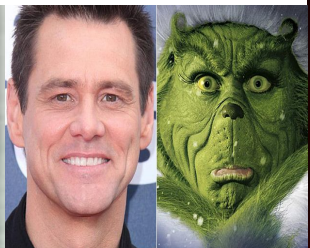

# Ray Harryhausen

- He chose this career because his parents always influenced him to do what he wants.
- He worked in Southern California
- I chose to research him because he seemed like he has a lot of interesting things about him.
